

Various Foil Print

We are versatile HOT FOIL PRINTERS, capable of blocking onto a wide variety of surfaces and products including plastics and leather, in small or large amounts. Below are listed many of these, with associated images, but this is by no means a complete list and if you require something 'foiled' please just ask us and we will be able to let you know if this is possible.

We also have a Foil Fuser, a piece of kit which allows us to foil print A4 paper/card without the need to make dies - perfect for small runs, for certificates etc.
